

Cleaning a Phone

Step-by-step guide

1. Disconnect your phone from its power source.
2. Prepare a solution that is 50:50 Isopropyl alcohol and purified water (purified bottled water is highly recommended). Do not use any other clean chemical on the device.
3. Dampen a soft, lint-free cloth with the prepared solution. Never apply the solution directly to the device.
4. Wipe the screen, handset, keypad and buttons with the cloth. Do not rub the screen or keys vigorously as it could damage them.
5. Wipe with a dry lint-free cloth to dry.
