Voicemail Message Forwarding

New and saved voicemail within NocTel can be forwarded to different extensions within an account.

Step-by-step guide

1. Connect to your voicemail inbox by pressing the voicemail key on the phone or dialing *38 or *98.
2. While listening to a message, or during the message options press **6**.
3. Enter the **extension number** where the message should be forwarded, followed by the **#** key.
