## **Changing a Voicemail PIN**

## **Using the Control Panel**

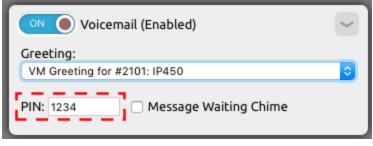

- 1. Login to the NocTel control panel.
- 2. Click on Extensions in the left-hand menu.

- 3. Locate the extension in the list or search for it using the search bar. Click the extension to open its options page.
- 4. On the extension's page locate the voicemail widget, and click > to expand the options.

5. In the PIN text box, delete the existing PIN, and enter a new PIN. (The PIN should be at least four digits and not start with 0.)

6. Click outside the widget to save.

## **Using the Phone**

If the PIN is unknown, the user must use the control panel method to reset the PIN.

- 1. Press the voicemail button on the phone or dial \*38.
- 2. Enter the current PIN.
- 3. Press 7 for setup.
- 4. Press 2 For new PIN.
- 5. When prompted enter the **new PIN** followed by the # key.
- 6. When prompted re-enter the new PIN followed by the # key.
